Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This action is responsive to communications: application filed on March 19, 2002.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 8, 11, 13, 17, and 19 drawn to a linking structure located between a central system and a satellite system, classified in class 455, subclass 13.2
- II. Claims 9-10, 12, 14-16, 18, and 20, drawn to a method for exchanging information between a central system and a satellite system, classified in class 707, subclass 10.
- III. Claim 21, drawn to a system for processing an operation of a central system with multiple couplers, classified in class 370, subclass 334.

The inventions are distinct, each from the other because of the following reasons:

Inventions in Group I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention in Group I has separate utility such as a linking structure which links the central system and the satellite system. Invention in Group II has separate utility and a method to read data from central system. Invention in Group III has separate utility and a system using different couplers for read/write command. See MPEP § 806.05(d).

Art Unit: 2166

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Examiner has informed Applicant's attorney about the election/restriction on February 6, 2009. No election was made during telephone conversation with Applicant's attorney Eric G. King on February 6, 2009.

The response time for this Office Action is **one month**.

Applicants are advised that the reply to this requirement to be complete must include and election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
